Sing-Specialists Medical Centre (SSMC) is bringing Singaporean healthcare standards to patients and their loved ones at affordable prices. They have an international medical team, comprised of experienced doctors from Singapore and Malaysia, who are supported by a competent team of well-trained foreign and local nurses.

Holistic Health Screening

As a one-stop medical centre, SSMC provides a comprehensive range of health screening packages for all ages and general health conditions. For patients who require a more tailored approach, they also provide customised screening for heart, liver and kidney health. SSMC has some of the most

advanced Philips Healthcare imaging equipment and their radiology centre is managed by Radlink Singapore – Singapore’s leading private diagnostic and molecular imaging service provider.

They strive to provide a 24-to-48-hour turn-around time for consultations and all their radiology scans are sent to Singapore for clinical interpretation – providing the right

Meng Cheng, Chairman of SSMC. “True to the Singapore brand and culture, SSMC values our patients’ health as well as their time.”

Renal Dialysis Centre

The SSMC Renal Dialysis Clinic was established by Dr Stephen Chew and Dr Ho Chee Kun from Aegis Medical Care, who have both

As a first of its kind in Cambodia, the SSMC Renal Dialysis Clinic is fitted with the world’s leading hemodialysis machines from Gambro Baxter International. The local clinical team has also been trained by Dr Chew and Dr Ho to provide the same high level of quality dialysis care services in SSMC.

“Our dialysis machines are extremely important as they are part of the care for our patients,” explains Dr Chew. “We are very stringent about the quality of water used, and therefore are using the latest reverse osmosis machines to treat our water supply in SSMC.”

SSMC currently has comprehensive yet flexible dialysis packages to support the needs of patients requiring hemodialysis and chronic renal care in Cambodia. ■

“ True to the Singapore brand and culture, SSMC values our patients’ health as well as their time. ”

results in a timely, safe and comfortable environment.

“We aim to provide efficient yet affordable care to our patients,” says Peter Ng

been engaged in the care of patients with kidney diseases for more than 25 years and manage 11 dialysis clinics in Singapore.
